EDUCATION

Amity University Rajasthan

Bachelor of Technology in Computer Science Engineering - **CGPA – 7.3**

2023 – present

Jaipur, Rajasthan

Jawahar Navodaya Vidyalaya

6th-Intermediate- PCM - **Percentage - 73.0%**

2015 – 2022

Tikamgarh

COURSEWORK / SKILLS

- Django REST framework
- Operating Systems
- Database Management System (DBMS)
- OOPS Concept
- Back - end Development

PROJECTS

School Management System (JNV)

- Developed a web-based system to manage student and staff records efficiently.
- Implemented features like adding, updating, and viewing records using structured forms.
- Designed responsive UI for better usability across devices.
- Used backend logic to handle data storage and retrieval.
- Ensured data validation and basic error handling.
- **Tech Stack:** Python, Django, Django REST framework, SQLite, JWT Authentication

Blog Website with Authentication (Django)

- Designed and developed a full-stack blog application using Django, following the MTV architecture.
- Implemented secure user authentication including signup, login, logout, and session management.
- Built role-based content control, allowing users to create, edit, and delete only their own blog posts.
- Developed REST-like backend views for blog CRUD operations using Django ORM for efficient database interactions.
- Implemented slug-based URLs and clean routing for SEO-friendly blog posts.
- Ensured application security using CSRF protection, form validation, and access-restricted views.
- **Tech Stack:** Python, Django, SQLite, HTML, CSS, Bootstrap

SKILLS

- **Programming Languages:** Python, Java, C++, C
- **Frontend:** HTML, CSS, Bootstrap
- **Backend:** Django, Django REST framework, JWT Authentication, RESTful APIs,
- **Database:** SQL, PostgreSQL, SQLite
- **Developer Tools:** VS Code, Postman, Git, GitHub
- **OS:** Linux (Basics)

BACKEND KNOWLEDGE

- Django MTV Architecture and request–response lifecycle
- Model design, migrations, and database relationships
- Django ORM, QuerySets, and optimized queries
- Authentication, authorization, and permissions
- CSRF Protection and backend security basics
